Subject Fw: Phone Call

Suzy was not able to speak at 8:30 this morning but has said she will call me today. Stay tuned...

----- Forwarded by Susan M Stalnecker/AE/DuPont on 01/17/2006 10:00 AM -----

Subject Phone Call

No doubt you are in the throes of the celebration. It is hard to fathom that the EPA was created in our lifetimes. It makes one wonder what would be different if it was celebrating 50 or 100 years. Savor the moment and congratulate each other. One lowly citizen can just say "thanks".

The purpose of my call is to describe our plans for next week, and make sure they are aligned with EPA's interests. Clearly we need to describe our reduction commitments to our customers, employees, investors and others and do so prior to the SAB (hopefully we will not be too late). Our plans include putting all the charts on our web site, issuing a press release, communication to employees and letters to customers. It is our hope, and that has been confirmed from time to time, that we could imbed a quote from you in that release. Having made the "ask", it is clear that other than some presentations, you have nothing in writing regarding our commitment. I have a letter ready to go which describes the DuPont Company commitment.

We are prepared to share all of this with you and your press office. I think you will find that we have taken every opportunity to cite the National PFOA Stewardship Program and our support for EPA's efforts to secure industry wide participation.

I am eager to speak with you and look forward to hearing from you.

006-0133-0082374

Thanks.
